

CHAMBER OF COMMERCE ELECTRIC COALITIONS

CHAMBER MEMBERS ARE SAVING MONEY ON THEIR COMMERCIAL ELECTRICITY BILLS!

HOW THE PROGRAM WORKS...

- Participation in the Electric Coalition is exclusive to members of the chamber.
- As a chamber member, you merely sign an authorization and fill out an information form that allows Fox, Smolen & Associates (FSA) to request usage data from the “wires” company that reads the meters and delivers your electricity.
- The usage data is analyzed, combined with a pool of other chamber members from around the state and prepared for the bidding process.
- The data is provided to a group of Retail Electric Providers (REPs) who have been pre-qualified based on contract terms and business practices.
- FSA notifies you of the upcoming bidding date, explains the pricing and acceptance process, and answers any questions.
- On the bidding date, an apples-to-apples comparison of all bids received for your business is computed to determine which offer will save you the most money.
- Our staff is available to assist you with any questions you might have about the recommended offer.
- When you accept a bid, your account will be transferred to the new provider within thirty to forty-five days, depending on the normal cycle for reading your meters.
- After you receive your first bill, FSA can compare it to your contract and help you resolve any differences.
- FSA is also available to assist you with other facility and energy usage matters such as new meter coordination or energy conservation.
- Fox, Smolen & Associates joined the Chamber to manage the Electric Coalition by obtaining competitive bids, presenting information on the evolving electricity market and providing personal customer service to meet your business needs.
